

Technology Transfer Program

▶ ▶ ▶ ▶ ▶ ▶ *intellectual property and technology commercialization*

SIU Energy Technology

Energy-related technology, research, projects and people at Southern Illinois University, presented by the SIU Carbondale Tech Transfer Office.

Goals:

- To provide a directory of the wide variety of energy-related research and projects going on through SIUC including available intellectual property.
 - To bring people involved together so everyone knows more about what everyone else is doing.
 - To increase visibility for SIUC's energy-related research efforts on the web.
 - In the longer term, to tie in regional environmental resources and business development in order to facilitate transfer of SIUC technology to benefit the region.

Announcing: New

SIU Energy Technology Weblog

<http://siuenergytech.blogspot.com/>

- ▶ You now have a starting point for information about energy-related research and projects at Southern Illinois University Carbondale. With the growing need for new energy sources in our world, it makes sense to focus our attention on the resources right here at Southern, and how we can expand and grow these resources to benefit the university and the people of our region. We are just at the beginning of this effort.
